

List of Proposal Based Programs

Menu	Duration	Purpose
Collaboration Program with the Private Sector for Disseminating Japanese Technology	Max. 2 years	To introduce products, techniques, know-hows and systems of the Japanese private sector through inviting relevant officials to Japan and holding workshops/seminars in developing countries for the future adaptation.
Feasibility Survey for SDGs Business	Max. 3 years	To contribute to meeting and responding to development challenges in developing countries.
Small and Medium-Sized Enterprise (SME) Partnership Promotion Survey	Max. 1 year	To support Japanese SMEs which plan to expand overseas businesses and contribute to meeting and responding to development challenges in developing countries.
Feasibility Survey with the Private Sector for Utilizing Japanese Technologies in ODA Project	1 year	To examine the potential use of Japanese companies' products and technologies for Japanese ODA projects. The scope of the survey includes network building and information gathering to develop ODA projects.
Verification Survey with the Private Sector for Disseminating Japanese Technologies	1-3 years	To verify the usefulness of selected Japanese products and technologies through actual installation and operation of products. The products will be handed over to the counterpart organization upon completion of the survey.

Adopted for JICA project. Project is expected to be implemented from 2019.
